                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 3. Application US/09970516
Patent No. 6610534
GENERAL INFORMATION:
APPLICANT. No. 6610534artis AG
TITLE OF INVENTION: Induction of blood vessel formation through administration of
TITLE OF INVENTION: polynucleotides encoding sphingosine kinases
FILE REPERENCE: 4-31617
CURRENT APPLICATION NUMBER: US/09/970,516
NUMBER OF SEQ ID NOS: 6
SOFTWARE: Patentin version 3.1

Patent No. 6800470.
GENERAL INFORMATION:
APPLICANT: Spiegel, Sarah
APPLICANT: Spiegel, Sarah
APPLICANT: Kohama, Takafumi
TITLE OF INVENTION: Mammalian Sphingosine Kinase Type 2 Isoforms, Cloning,
TITLE OF INVENTION: Expression and Methods of Use Thereof
FILE REFERENCE: 00170/HG
CURRENT APPLICATION NUMBER: US/09/817,676A
CURRENT FILING DATE: 2001-03-26
PRIOR APPLICATION NUMBER: US 60/194,318

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ò
                                                                                                                                                                                                                                                                                                                                                    Sequence 5, Application US/09784810A

Sequence 5, Application US/09784810A

Patent No. US20020082203A1

GENERAL INFORMATION:
APPLICANT: RASTELL: LUCA

TITLE OF INVENTION: NOVEL SPHINGOSINE KINASES AND NUCLEIC ACIDS ENCODING
TITLE OF INVENTION: SAME

FILE REFERENCE: 1071-6-08

CURRENT PELING DATE: 2001-02-14

PRIOR APPLICATION NUMBER: 60/182,360

PRIOR APPLICATION NUMBER: 60/182,360

PRIOR FILING DATE: 2000-03-22

NUMBER OF SEQ ID NOS: 29

SEQ ID NO S: 29

SEQ ID NO S: 29

LENGTH: 1840
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         120
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               383

/ Under This is a long-transcript enriched cDNA library (Genome Res. 11: 153-1558 (2001). [PMID: 1154199] from WAO1 cell line. Undifferentiated human ES cell line WAO1/HI was obtained from WiCell Research Institute, Inc., Madison, Wi, cultured according to their instructions, on WEF feeders. They formed according to their instructions, on WEF feeders. They formed colonies with defined edges and were positive for alkaline phosphatase, SSEA-4, OCT3, OCT4, REX1, UTF, TERT, SOX2, CX43 and CX45. FLF3, SSEA-1, TUBB3, NES, GFAP, and EOWES. When confluent (18-10 days after plating), the ES cells from 4 X 6cm dishes were treated with 1 mg/ml collagenase, type IV (Invitrogen/GIBCO) for 5-10 min and gently Scraped off with 5 ml pipette. RNA was purified with TRIZOl Reagent from Invitrogen. Protocol ref: Genome Res. 11: 1553-1558 (2001). [PMID:11544199]) Double-stranded cDNAs were synthesized with an Oligo(dT) primer [Invitrogen:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               3.4g of total RMA, treated with T4 DNA polymerase, and purified by ethanol-precipitation. The CDNAs were ligated to Lone-linker LL-Sall4, purified by phenol/chloroform extraction, and separated from free linkers by centricon-100 column. Then, the CDNAs were amplified by long-range high fidelity PCR using Ex Tag polymerase (Takara) with a primer Sal4-S for 25 cycles. The products were purified by phenol/chloroform extraction and Centricon-100 column. The CDNAs were digested with Sall and NotI enzymes and cloned into Sall/NotI site of polym-SPORTE plasmid vector. The average insert size is about 3.6kb."
